(54) Title: HEART MONITOR WITH REMOTE ALARM CAPABILITY

(57) Abstract: A mobile phone (108) is configured as an adjunct to a medical monitoring device (100) to make an emergency phone call (228) to a predetermined, trusted care-giver or -overseer (120) when an abnormal medical condition is detected by the device (204). The phone and the device preferably communicate wirelessly with each other, as through a Bluetooth connection (212). Preferably, the phone is equipped to play back a pre-recorded voice message on the phone call (236), which may include the current location of the patient (216, 220), instructions personalized to the care-giver (168), and an image or video playback of the patient. The phone may concurrently page emergency medical services.
